Ms. Jane Pfeiffer

Project # 40441

Remediation and Redevelopment Program
Wisconsin Department of Natural Resources
2300 North Martin Luther King Drive
Milwaukee, WI 53212

Subject: **Contained Out Determination for Proposed Modification of Vapor Mitigation /
Extraction System for Community Within the Corridor – East Block
2748 N 32nd Street, Milwaukee, WI 53208
BRRTS # 02-41-263675 FID 241025400**

Dear Ms. Pfeiffer:

On behalf of the Community Within the Corridor Limited Partnership, we are pleased to submit a request for a contained out decision for disposal of soils contaminated with trichloroethylene (TCE) located in the Community Within the Corridor – East Block project. Please consider this submittal an addendum to the previously submitted technical assistance request. We request your approval for a contained out decision as soon as possible.

Project Background

The Community Within the Corridor Limited Partnership is proposing to redevelop the property into a mix of affordable housing, commercial spaces, and other amenities. The property was previously investigated and granted Case Closure with continuing obligations as an industrial property under BRRTS # 02-41-263675. KSingh was retained to perform environmental consulting services for the redevelopment of the property. The following investigations have been performed and submitted to WDNR.

- Phase I Environmental Site Assessment - March 10, 2020
- Phase II Environmental Site Assessment - May 24, 2020
- Indoor Air and Sub-Slab Vapor Sampling - July 7, 2020
- Request for Post Closure Modification - July 8, 2020
- Additional Information re: Decommissioning of Current Sub-Slab Depressurization System and Implementation of Parking Garage - September 15, 2020
- Environmental Investigation Memorandum - August 24, 2020
- Sub-Slab Vapor Investigation Work Plan - November 12, 2020
- Response to WDNR Review of Sub-Slab Vapor Investigation Work Plan - December 3, 2020
- Additional Sub-Slab Vapor Sampling Investigation for Post Closure Modification - January 8, 2021
- Feasibility Study and Design – Vapor Mitigation System – March 10, 2021
- Update to Post Closure Modification Request / Remedial Action Plan – March 19, 2021
- Additional Soils Investigation – March 24, 2021

Based on the findings of the additional investigations, WDNR has decided to reopen the case and has requested additional site investigation to complete a NR 716 Site Investigation. However, in regard to the building itself, the sub-slab vapor investigation is complete, and we have requested that WDNR grant approval of the vapor extraction / mitigation system. The WDNR responded with additional questions and comments in a letter dated April 9, 2021 and requested that KSingh include hot spot removal in a revised plan. A revised plan was submitted to the WDNR on May 4, 2021 and is currently awaiting review.

The trenching for installation of the system and the hot spot removal will encounter soils contaminated with TCE. Three locations that were tested, VE-4, EB-IB-2, and EB-IB-3, which contained TCE greater than 8.8 mg/kg with total concentrations of 13 mg/kg, 18 mg/kg, and 14 mg/kg respectively. The locations of the testing are shown on Figure 1. To determine if the soils were characteristic of hazardous waste, Total Characteristic Leaching Protocol (TCLP) tests were performed at the three locations. Test results are summarized in Table 1 and included in Attachment A. TCLP test results at VE-4, EB-IB-2, and EB-IB-3 reported test results of 0.06 mg/L, 0.085 mg/L, and 0.18 mg/L, respectively.

Rationale for Contained Out Decision

One of the options for managing excavated soils at the project is for TCE contaminated soils to be disposed of at a licensed solid waste landfill as a Special Waste under a “contained out” decision.

TCE may be a listed hazardous waste under NR 661.31 if the source of the TCE is associated with degreasing with spent solvent mixtures or blends containing, before use, a total of 10% or more (by volume) of TCE. A thorough review of site history has been performed as part of the remedial investigation process, including a Phase I ESA. Based on the investigations, we have concluded that the TCE contamination in soil has no known source or date of release to the environment other than generally being part of industrial operations at the facility. EPA guidance indicates: “Where a facility owner/operator makes a good faith effort to determine if the material is a listed hazardous waste but cannot make such a determination because documentation regarding the source of contamination, contaminant or waste is unavailable or inconclusive, one may assume the source, contaminant or waste is not a listed hazardous waste.” The EPA guidance goes on to say: “Therefore, provided the material in question does not exhibit a characteristic of hazardous waste, RCRA requirements do not apply.” Please refer to Attachment B for a completed Remediation Site Hazardous Waste Determination form. Therefore, the TCE present in soil is not a listed process and the material is eligible to be considered for a “contained out” decision if the material is not characteristic of hazardous waste.

In “Contained-Out” Values for PCE, TCE and Vinyl Chloride”, Pub-RR-969, published December 2013, the WDNR reported a “contained out” value for soils containing TCE of 8.8 mg/kg. The maximum concentration of TCE detected in soil in the Community Within the Corridor – East Block is 18 mg/kg. However, TCLP tests were performed on TCE contaminated soils, the maximum TCLP concentration of TCE is less 0.5 mg/L which is the listed toxicity regulatory level under 40 CFR 261.24 and which Orchard Ridge RDF is licensed to accept. Therefore, TCE contaminated soils in the Community Within the Corridor – East Block are not characteristic of hazardous waste and meet the WDNR’s “contained out” criteria.

Closure

We request WDNR concurrence that the material is not characteristic of hazardous waste and soils from the Community Within the Corridor – East Block can be disposed of as a special waste as part of the Vapor Extraction / Vapor Mitigation System plan review. Please call if you have any questions regarding this submittal.

Sincerely,

(1) From WDNR RCLs Worksheet dated December 2018

BOLD values exceed Groundwater Protection, Non-Industrial Direct Contact, or Industrial Direct-Contact RCLs

--- = Not analyzed / No established standard

J = Result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an approximate value

F1 = Matrix spike and/or matrix spike duplicate recovery exceeds control limits

B = Compound was found in the blank and sample

*+ = Laboratory control sample and/or laboratory control sample duplicate is outside acceptance limits, high biased

* = Laboratory control sample and/or laboratory control sample duplicate is outside acceptance limits

** = Combined established standard of 1,2,4-trimethylbenzene and 1,3,5-trimethylbenzene

*** = Combined established standard for NR 720 RCLs for groundwater protection

(1) From WDNR RCLs Worksheet dated December 2018

BOLD values exceed Groundwater Protection, Non-Industrial Direct Contact, or Industrial Direct-Contact RCLs

--- = Not analyzed / No established standard

J = Result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an approximate value

F1 = Matrix spike and/or matrix spike duplicate recovery exceeds control limits

B = Compound was found in the blank and sample

*+ = Laboratory control sample and/or laboratory control sample duplicate is outside acceptance limits, high biased

* = Laboratory control sample and/or laboratory control sample duplicate is outside acceptance limits

** = Combined established standard of 1,2,4-trimethylbenzene and 1,3,5-trimethylbenzene

*** = Combined established standard for NR 720 RCLs for groundwater protection

(1) From WDNR RCLs Worksheet dated December 2018

BOLD values exceed Groundwater Protection, Non-Industrial Direct Contact, or Industrial Direct-Contact RCLs

--- = Not analyzed / No established standard

J = Result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an approximate value

F1 = Matrix spike and/or matrix spike duplicate recovery exceeds control limits

B = Compound was found in the blank and sample

*+ = Laboratory control sample and/or laboratory control sample duplicate is outside acceptance limits, high biased

* = Laboratory control sample and/or laboratory control sample duplicate is outside acceptance limits

** = Combined established standard of 1,2,4-trimethylbenzene and 1,3,5-trimethylbenzene

*** = Combined established standard for NR 720 RCLs for groundwater protection

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Comments

No additional comments.

Receipt

The samples were received on 4/16/2021 9:15 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.3° C.

GC/MS VOA

Method 8260B: The following samples were diluted to bring the concentration of target analytes within the calibration range: EB-IB-2 (0.5'-1.5') (500-197706-3) and EB-IB-3 (0.5'-1.5') (500-197706-4). Elevated reporting limits (RLs) are provided.

Method 8260B: The method blank for preparation batch 594294 and the laboratory blank (LB3) for 593824 contained Chloroform and Methylene chloride. None of the samples associated with these blanks contained the target compound; therefore, re-extraction and/or re-analysis of samples were not performed. EB-IB-1 (0.5'-1.5') (500-197706-2), EB-IB-2 (0.5'-1.5') (500-197706-3), EB-IB-3 (0.5'-1.5') (500-197706-4) and T.B. (500-197706-5)

Method 8260B: The laboratory control sample (LCS) for 593824 recovered outside control limits for Chloroethane. This is a prepped 5035 LCS. All daily instrument LCSs were acceptable, and the data have been reported. EB-IB-1 (0.5'-1.5') (500-197706-2), EB-IB-2 (0.5'-1.5') (500-197706-3), EB-IB-3 (0.5'-1.5') (500-197706-4) and T.B. (500-197706-5)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Job ID: 500-197706-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
*+	LCS and/or LCSD is outside acceptance limits, high biased.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
D	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	3.3
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

ATTACHMENT B

Form 4430-019 Remediation Site Hazardous Waste Determination

Notice: This voluntary form is intended as an aid for use by Generators and Responsible Parties in determining whether *contaminated soil or groundwater and wastes* encountered or generated during the remediation of contaminated sites in Wisconsin are or would be listed or characteristic hazardous wastes subject to regulation under ch. 291, Wis. Stats. and chs. NR 600 to 690, Wis. Adm. Code. There are no penalties for failure to provide information requested. Personally identifiable information collected will be used for program management. Wisconsin's Open Records law requires the Department to provide this information upon request [ss. 19.31 - 19.69, Wis. Stats.].

Listing determinations are often particularly difficult in the remedial context because the listings are generally identified by the sources of the hazardous wastes rather than the concentrations of various hazardous constituents. Therefore, analytical testing alone, without information on a waste's source, will not generally produce information that will conclusively indicate whether a given waste is a listed hazardous waste. Generators and Responsible Parties should use available site information such as material safety data sheets (MSDS's), manifests, vouchers, bills of lading, sales and inventory records, accident reports, spill reports, inspection reports, and other available information. It may also be necessary to conduct interviews of current or former personnel who would have knowledge of the processes and hazardous materials used including waste handling or past spills in an effort to ascertain the sources of wastes or contaminants.

Where a person makes a good faith effort to determine if a material is a listed hazardous waste but cannot make such a determination because documentation regarding a source of contamination, contaminant, or waste is unavailable or inconclusive, EPA has stated that one may assume the source, contaminant or waste is not listed hazardous waste and, therefore, provided the material in question does not exhibit a characteristic of hazardous waste, RCRA requirements do not apply.

Generator Information

Generator's Name Community Within the Corridor Limited Partnership	Preparer's Name Robert Reineke, PE / K. Singh & Associates, Inc.
Address 110 Cheshire Lane, Suite 120	Address 3636 N 124th Street
